My first MVP for my capstone project will be the user being able to register and login to their own account on my website. The next mvp will be getting and displaying the activities a user can add to their trip. Third is the user's planner for their specific trip, being able to save activities to the dates they will be traveling.

**USER**
- User ID
- Username
- Password
- First name
- Last name
- Address
- Email
- Phone number

**ACTIVITIES**
- User Id
- Activity name
- Skill level (1-5)
- Estimated time
- Description of activity
- Location
- Price

**USERS TRIP ITINERARY**
- User Id
- Time of breakfast, lunch, dinner
- Activities user has saved/is interested in
- Budget
- Activities saved to calendar
